### Opis produktu

The Bordo 6010/90 from Abus with security level 10 out of 15 is the classic in a noble Centium design. The folding lock is the perfect combination of resistance and flexibility with a tiny transport size.

Reliable protection against theft, high flexibility: The BORDO CENTIUM™ 6010/90 from Abus  
Special rivets connect the six 5mm thick steel bars which can be folded into a compact block to minimise transport size. In the CENTIUM version, the folding lock features an elegant design – with a matt, stainless-steel body and a small stainless-steel holder which enables space-saving removal from the side. The steel bars come in a plain black synthetic coating which enhances the aesthetics of the lock and prevents damage to your bicycle's paintwork. The BORDO CENTIUM™ 6010 Folding Lock is easy to use: the key has a light which makes locking and unlocking your bicycle easier in the dark, and it is coded too. This means that you can order multiple locks keyed alike and use the same key for all of the locks.  
Features - Abus Bordo Centium™ 6010/90 SH

5 mm thick bars, synthetic coating to prevent damage to paintwork  
Stainless-steel body with manually operated keyhole cover to protect against dirt  
The bars are made of specially hardened steel  
Bars are linked with special rivets  
ABUS Plus cylinder for a high level of protection against tampering, e.g. picking  
Great protection for when there is a high risk of theft  
Recommended for securing good-quality bicycles  
The longer the chain, the easier it is to lock the bicycle to a fixed object  
This lock can be ordered with other keyed-alike locks, all of which are operated using the same key or locking method  
Perfect combination of durability, flexibility, weight and transport dimensions

#### Product features

Level: 10 of 15  
Carrier: incl. SH Holder  
Locking type: key  
Circumference: 90 cm

Color

black

Weight

1120g (manufacturer information)

Scope of delivery

1 Abus Bordo Centium 6010/90 Folding Lock  
1 Abus Holder SH  
2 Abus keys

Technology

ABUS Level System Bicycle locks can have very different requirements. The two main aspects are the bike and the location where you want to lock it. But also the weight of the lock plays a role – a lock on the road must not be too heavy, unlike a lock for home. The ABUS Level System is a transparent system that reflects the security level of the lock. The scale – shown as a speedometer – reaches up to level 15 for bicycle locks, making it easier to find the right lock for you and your bike!
