Product description

The DT Swiss 350 is a high-quality rear hub designed for Fatbike bicycles, offering reliability, durability and excellent performance on demanding terrain. Its robust yet carefully engineered construction delivers outstanding functionality, making it suitable for everyday riding as well as challenging off-road adventures.

The hub features the proven **Ratchet System 36T**, ensuring fast engagement, precise power transfer and efficient transmission of pedaling force to the rear wheel.

This model comes with a **6-bolt disc brake mount (6-Bolt)** and a **Shimano Micro Spline freehub body**, designed for use with compatible Shimano cassettes, including cassettes featuring a 10-tooth smallest sprocket.

Thanks to its simple and functional design, the DT Swiss 350 is easy to maintain. The freehub system can be serviced without specialized tools. Its construction also allows conversion to different axle and drivetrain standards.

The DT Swiss 350 Fatbike is an excellent choice for riders looking for a durable, reliable and proven rear hub.
