Product description

Description:
This brake disc is designed for efficient heat dissipation during long and steep descents. The improved construction reduces thermal deformation, resulting in quieter operation and higher, more consistent braking performance without increasing rotor weight.

The new arm shape reinforces the structure and minimises vibration, enhancing overall braking smoothness. It is an ideal choice for riders who demand reliable and stable braking power in challenging conditions.

Outer diameter: 180 mm
Mounting system: Center Lock with lock ring, internal splines with magnet
Material: Stainless steel, aluminium, stainless steel
Packaging type: Single package
