## Garbaruk Shimano Micro Spline 10-52T 12speed cassette Red

Price	<b>295.78 €</b>
Availability	 <b>Availability 2-5 days (external warehouse)</b>
Number	<b>50019940</b>
EAN	<b>5907441532808</b>

### Product description

#### Legendary performance - now compatible with Micro-Spline

The Garbaruk 12-speed cassette compatible with the Shimano Micro-Spline hub standard everyone has been waiting for is now available. Now you can combine the latest drivetrain technology on the market with the exceptional performance of Garbaruk components. The lightweight and rigid design combined with the unique tooth profile allows for extremely smooth shifting and reduces chain drop.

#### Lightest Micro-Spline MTB cassette on the market

At 349 grams, Garbaruk's Micro-Spline compatible cassette is uncompromisingly superior to any of the existing competing products on the market. Our cassette features the lowest possible weight: 11 rows have been cut from a single piece of steel, and the 52-tooth sprocket is made of 7075 aluminum alloy. With a 520% span, our solution provides the widest gear range for such a lightweight product, giving you the ability to climb the steepest mountains.

#### Precision machined from aluminum and steel

Producing such a lightweight MTB cassette requires precision CNC machining. The largest sprocket is made of 7075-T6 aluminum alloy and anodized in an eye-catching array of 8 colors: black, blue, gold, green, orange, red, silver and purple. The 11-speed sprocket is milled from a single piece of hardened steel and coated with a durable anti-corrosion coating to ensure maximum durability.

#### Smooth shifting and uncompromised compatibility

Our 12-speed 10-52T cassette is designed so that the gear ratios are larger at lower speeds and smaller at higher speeds. This allows for smoother gear changes at higher speeds, resulting in more precise drivetrain operation. You can use our 10-52T cassette for Micro-Spline with any 12-speed chain, but we recommend using Shimano 12-speed chains for excellent shifting quality. Please note that a Shimano 12-speed derailleur with long travel (SGS) is required for smooth cassette operation.

Weight, in grams: 349±2%

Cassette gears: 10-12-14-16-18-21-24-28-32-37-44-52
