Producer code	81240102
EAN	8804269652152

Product description

The IBEX 2.0 road helmet is an ultralight and comfortable helmet designed for optimal ventilation. Its unique shape improves aerodynamics and allows for faster heat dissipation.

Developed in HJC's own wind tunnel, the IBEX perfectly balances drag forces. The helmet is perfect for intense exertion and hot weather thanks to its impressive and well-balanced design.

At only about 200g, this perfectly ventilated helmet (16 vents) will also surprise you with its aerodynamics. It is also equipped with strap spacers and X-Static antimicrobial pads.

The helmet comes complete with spare pads and a bag when you want to take it on the road.

SELFIT™

SELFIT™ is an automatic, self-adjusting system that is a revolutionary technology in the fit of bicycle helmets.

Once the helmet is fitted to your head, it requires no further adjustment, even when your head moves while riding. The SELFIT system automatically adjusts the spacing and provides the perfect fit and comfort for your head.

5 STEP SNAP FIT™

5 STEP SNP FIT™ provides consistent fit and comfort for all head types and sizes. The rider can fine tune their helmet fit.

COOLPATH™

COOLPATH™ is a new technology patented by HJC. Replacing the inner liner allows cool air to flow around the head and improves comfort while riding. The cool air flow and lightness of the helmet improve the fit and provide a superior riding experience.
