Product description

ABUS is a company that plays an important role in the bicycle market by providing high-quality security solutions for bicycles. Their products are valued by both professional cyclists and everyday bicycle users for their effectiveness, durability and innovation. The company is known for constantly adapting its offerings to meet the changing needs of the market. It offers security features of varying degrees to meet the expectations of different user groups, from urban cyclists to mountain bikers. In addition, **ABUS** is committed to bicycle safety education and actively participates in campaigns to promote protection against bicycle theft. These activities allow the brand not only to provide products, but also to act as a thought leader in the field of bicycle safety. As a result, **ABUS** has earned a reputation as a reliable partner for bicycle enthusiasts, offering comprehensive security solutions that allow users to enjoy their passion without worrying about the safety of their equipment.

ABUS GameChanger Mips 2.0 Shiny White S helmet

GameChanger 2.0 - Get the Advantage in Racing for Every Watt of Energy

GameChanger2.0 is a helmet created for true cycling enthusiasts who are constantly striving to improve their performance. Designed to reduce drag and optimize airflow, this racing bike helmet offers advanced features to take your racing experience to a new level.

Aero Blade - Airflow Optimization

With **GameChanger 2.0**, the principle is one: reduce air resistance. The introduction of a wider rear in the shape of the **Aero Blade** is a key part of this achievement. Thanks to a special mesh structure, it adapts to different conditions, making the helmet respond optimally to varying speed, side angles and inclination. In this way, **GameChanger 2.0** can handle any racing situation.

Advanced Ventilation System - Cool Head during Intense Rides

The **AirBoost** air intake and advanced ventilation system keep your head cool even during the most intense rides. This is crucial for comfort, especially when every effort counts.

Patented ActiCage Adjustment System

The patented **ActiCage** adjustment system not only customizes the helmet, but also increases its stability. It's a solution that makes comfort and safety go hand in hand.

MIPS - Protection against Rotational Forces.

In the **MIPS** variant, the **Air Node Rot** ation system acts as an extra layer of protection, mitigating rotational forces in the event of a fall and providing better brain protection.

Technical Specifications
