WHEELS DESIGNED FOR BRAKES:

SPRINGS

Dt Swiss competition race Straight pull
2.0/1.6/2.0

DISC TYPE: Disc mounted with 6 screws.
IS standard

DT competition race Straight pull
2.0/1.6/2.0 mm

Straight pull - a straight spoke does not
have the characteristic bend at the head,
which in effect eliminates the weakest
point of a conventional spoke.

Double butted - reduced spokes are
thinner in their middle section. Despite
the reduction in weight, such a spoke has
lost nothing of its strength and flexibility.

NYPLE

DT Swiss Pro Lock Aluminum Squorx

DT Swiss Pro Lock Aluminum nipples
DT Swiss Pro Lock - a patented liquid
applied to the thread of the nipple allows

WEIGHT: FRONT WHEEL weight given without clamp	770g	building very strong wheels stated weight may vary slightly due to the possible uniqueness of the weight of individual components stated weight may vary slightly due to possible uniqueness in weight of individual components weight shown may vary slightly due to possible uniqueness in weight of individual components
WEIGHT: REAR WHEEL weight given without clamp	880g
