Product description

At FITWHEELS, we make the wheels. As many cyclists there are, there are so many needs for selecting and personalizing the right set of wheels. When producing a wheel, we only use components from reputable companies. In order to meet the needs of the customer, we make it possible, using the contact form, to fully customize the wheel specifications. All wheels built by FITWHEELS go through a demanding process to ensure the high quality of the final product. DT Swiss - Swiss manufacturer of wheels, hubs, rims and other components necessary for the construction of wheels at the highest level. The brand's products are known for their high quality workmanship, reliability and unique design. NoTubes - an American brand that hardly needs to be introduced to anyone. Stan's NoTubes specializes in the production of bicycle wheels and rims of the highest quality for all varieties of cycling.

Sapim - Belgian company specializing in the production of spokes and nipples for wheel production. Together with the DT Swiss Company, they are the undisputed market leaders in their industry.

The presented set of wheels is built in DT Swiss components . The set is designed for demanding users who value reliability, low weight and individual design. The set of wheels is compatible with the tubeless ready system. The wheels are equipped with tubeless ready tape.

If you would like to make changes to the presented set, please contact us. We can prepare your customized set of wheels.

The wheels are equipped with DT Swiss 370 hubs, DT Swiss hubs are synonymous with durability and reliability. The front hub has two machine bearings. The rear hub is equipped with four machine bearings and a three-pawl system , which guarantees perfect operation of the freewheel. Servicing the rear hub is very easy. Service does not require the use of tools.

Model MK4 is the next revision of the ZTR Crest rim. The outer width is increased to 25mm to improve stability. The MK4 model is designed for XC racing and gravel applications. The BST-A technology, which is an asymmetrical rim, combined with widened and lowered sidewalls, ensures even spoke tension and thus enables the construction of a perfectly balanced wheel.

The connecting elements between hubs and rims are spokes and nipples . We uncompromisingly used Sapim D-Light spokes . The spokes are shaded 2.0-1.65-2.0.

Anodized Sapim polyax nipples are coated with a special coating that increases strength and allows easier wheel building. The aluminum nipple definitely reduces the weight of the wheels.

Sapim's patented Secure Lock technology is a locking mechanism that prevents the nylons from unscrewing. Highly precise

and accurate machines have been specially developed to produce this type of locking system.

This product has additional options:

Front axle: 12/100 mm TA (+ 16.45 €), 15/100 mm TA , 15/100 mm TA + adapter QR 5mm (+ 20.24 €), 15/110 mm PS , 15/110 mm TA / Boost (+ 10.12 €)

Rear Axel / freehub: 12/148 mm TA / Boost / Shimano Microspline (+ 48.07 €), 12/148 mm TA / Boost / Shimano MTB (+ 10.12 €), 12/148 mm TA / Boost / Sram XD MTB (+ 27.83 €)

Front hub: DT Swiss 370 straightpull disc brake

Rear hub: DT Swiss 370 straightpull disc brake

Brake type: disc

Brake rotor mounting system: IS - 6 bolt

Rims: NoTubes Crest MK4

Wheel size: 29"

Rim material: Aluminium

Quantity of spokes front/rear: 28 / 28

Tires type: Clincher

Compatible with Tubeless systems: Yes

Rim inner width: 25mm

Colour of spokes: black

Spokes: Sapim D-Light

Nipples: Sapim SILS sLock polyax aluminium

Riding Styles / Intended use: Cross Country

Recommended system weight max.: 100kg

Warranty: 2 years
