Mavic Cosmic Elite UST road wheels Yksion Elite UST 700x25C

Price	**243.96 €**
Previous price	~~**455.11 €**~~
Availability	**Unavailable**
Number	**90010506**
EAN	**1016488074463**
Width axis	**9mm**
Colour hub	**Black**
Number of holes	**20H**
Version	**20H Shimano**
Color	**black**
The front wheel axle	**100/9**

Product description

The Cosmic Elite is the perfect starting point for racing. The all-new UST Tubeless system provides a smoother ride and better puncture resistance, with lightweight climbing and acceleration.
By removing the tube, we've also removed friction - so there's less rolling resistance, which means it requires less energy to reach higher speeds. The UST system has an airtight seal that makes it more resistant to punctures and is also 40 grams lighter than a traditional under-tube system. It also provides a proven aero advantage:
Wind tunnel testing led us to create a rim height of 30 mm that optimizes aerodynamic performance and improves stability in side winds. The alloy rim benefits from our unparalleled experience, creating lightweight but strong rim profiles. Mavic does this by carefully adjusting the thickness of the rim wall to hit the mark between stiffness, strength and weight.
Super-lightweight wide 17mm ISM 4D rims for greater comfort and low rolling resistance. Pedaling is efficiently transmitted thanks to our FTS-L system drum, which is light, smooth, stiff and easy to handle.
The Cosmic Elite comes with Yksion Pro UST tires, which provide very low rolling resistance, further enhancing the efficiency of these wheels.

They spin faster and smoother, reducing the risk of punctures
Thanks to UST Road Tubeless, the inner tube does not cause friction. This gives you lower rolling resistance and higher speeds.
UST Road Tubeless allows you to ride with lower tire pressure for a smoother ride and less risk of punctures
The patented UST system offers a perfect tire and wheel connection, making installation, removal and maintenance easy.

Increased speed and efficiency during sprints and solo riding
Aerodynamic profile with a height of 30 mm
Ultra-shaded straight spokes
Aerodynamic hubs
Long-lasting durability you can rely on
SUP welding
Reinforced welding gives incredible resistance to the rim
Replaceable sealed QRM bearings

Weight
700x25 tire: 260 grams
Pair of wheels without tires: 1770 grams

Front: 815 grams
Rear: 955 grams

COMPATIBILITY:
25 - 32 mm tires

RIM:
Material: S6000 Aluminum
Profile height: 30mm
Inner rim width 17mm
Outer rim width 22mm
Joining: SUP weld

SPRINGS:
Material: stainless steel
Type: straight, flat, shaded
Nipples: ABS steel
Number: front 20, rear 20
Fitting: front radial, rear 2 crosses on the drive side

DRIVE DRIVES:
Body: aluminum
Axle: aluminum
Adjustable, sealed machine bearings
Cylinder: FTS-L, steel

INCLUDED:
Mavic Yksion Pro UST 25mm tires
BR101 quick releases
UST vents and accessories
Multifunction adjustment wrench
Sealing fluid including syringe
Instruction manual
