- Chainline: **45.0 mm**
- Crank material: **Aluminum**
- Protection: **No cover**
- Bolt circle diameter (BCD): **110 BCD**
- Color (crank arm): **Black**

SRAM Rival 22: Break through your limitations

The **SRAM Rival 22** drivetrain is a unique offering for a variety of bikes and disciplines. Whether you ride on asphalt, compete in cyclocross or triathlon, **the Rival 22** delivers ergonomics, efficiency and advanced technology to meet every challenge and expand your capabilities. The requirements of passionate cyclists are equally important, although they may differ from professionals. Your needs change as your riding and performance progresses, whether you're ready for racing or adventure tours. That's why it makes sense to invest in a drivetrain that offers a full spectrum of capabilities. The new Rival 22 crankset is a prime example of this. It's designed with performance in mind, using forged aluminum in the crank arm and milled aluminum in the discs. Like the **RED** and **Force 22** models, it uses a hidden bolt pattern that improves stiffness and enables a sleek design. Optimized X Glide R™ chains work with YAW™ technology in the front derailleur to ensure smoothness and excellent performance.

With available gear ratios, such as 50/34 for easier climbs or 52/36 ideal for time trials and triathlons, the **Rival 22** drivetrain adapts to your needs for comfort and efficiency in a variety of situations.
