WTB KOM LIGHT i-21 29\" 28H rim

Price	103.99 €
Availability	 Availability 2-5 days (external warehouse)
Number	50018946
Producer code	W020-0579
EAN	714401205796

Product description

Bike Rim.

As light as carbon fiber, and wider than competitors' aluminum rims. WTB shows what's possible with the new WT69 aluminum. Created with one purpose - to win.

Technologies:

TCS 2.0 - The TCS rim profile was designed specifically for TCS or UST tires but can also be successfully used with tubeless systems. This profile increases the rigidity of the entire structure. When installing tubeless tires (TCS or UST) with TCS rims, you need a much lower initial pressure to inflate the tire. In most cases, you can manage with an ordinary hand pump. An additional tape groove prevents the sealing tape from breaking.

4D - A new hole-drilling process used on Stryker wheels and Frequency rims results in a perfect fit between the spokes and the rawk. Drilling the holes at an angle reduces stress on the spokes and increases their strength

number of holes: 28

material: Forged Aluminum WT69

size: 29" 622x21C

weight: 441g

technologies: TCS2.0, Unbendium Bulge, I-Beam, 4D angled spokes

compatible with disc brakes

color: black
