WTB TOUGH i-35 27.5'' 32H rim

Price	**80.42 €**
Availability	**Availability 2-5 working days (external warehouse)**
Number	**50009180**
Producer code	**W020-0569**
EAN	**1016488083762**

Product description

Bike Rim.
As light as carbon fiber, and wider than competitors' aluminum rims. WTB shows what's possible with the new WT69 aluminum. Created with one purpose - to win. Double I-Beam for structural strength.

Technologies:
TCS 2.0 - The TCS rim profile was designed specifically for TCS or UST tires but can also be successfully used with tubeless systems. This profile increases the rigidity of the entire structure. When installing tubeless tires (TCS or UST) with TCS rims, you need a much lower initial pressure to inflate the tire. In most cases, you can manage with an ordinary hand pump. An additional tape groove prevents the sealing tape from breaking.
4D - A new hole-drilling process used on Stryker wheels and Frequency rims results in a perfect fit between the spokes and the rawk. By drilling the holes at an angle, the stresses in the spokes are reduced and their strength is increased

lnumber of holes: 32
material: Forged Aluminum WT69
size: 27.5'' 584x35C
weight: 602g
technologies: TCS2.0, Unbendium Bulge, I-Beam, 4D angled spokes
compatible with disc brakes
color: black
