Size tube and tire	29x2,00

Product description

The Double Fighter III rolls lightly on asphalt and paved roads, while providing a good margin of safety in corners. Raised side blocks provide good grip even on gravel roads. The side of the tire is covered with a special reinforced mesh, which protects against cuts. This model is designed for those who love fast riding on light terrain and asphalt in dry conditions.

The Double Fighter tire with a new design is available in different sizes. Thanks to its solid side tread profile, it is suitable for both city and off-road driving. At the same time, it rolls lightly and quietly on the asphalt. Raised side knuckles provide good grip in park alleys and on gravel roads. This tire is a great solution that combines the characteristics of off-road tires with urban tires.

- Dimensions: 29x2.00
- ETRTO: 50-622
- Braid: 3/180 TPI
- Recommended pressure: 3.5-4.5 bar
- Weight: 915g
- Wired
