Availability	 Available (shipping in 2-5 days)
Number	50009815
Producer code	45000864
EAN	4260477069382

Product description

An update to Ergon's most popular backpack is now even easier to use. Ideal for Enduro and All-mountain. One for all - with an improved four-way adjustable back length suspension system, it can be easily adjusted in the S-XL size range. With the load compression capability of the "Adaptive Carrier System" and a flexible rail, you can more precisely adjust the fit to your anatomy. The hip belt can be shortened if necessary. The backpack has one main pocket and 4 internal pockets, a separate compartment for a water bag, a front pocket for tools and a pump, and a pocket in the belt. An additional pocket on the back provides space for a spine protector (BP100) and a water bag (BH300).
