## Shimano Deore XT RD-M781 Shadow 10speed rear derailleur

Availability

 **Unavailable**

Number

**MIG-19507**

EAN

**1016488054823**

### Product description

The top-of-the-line rear derailleur RD - M781 from the XT group, with the Top Normal system for fast and precise shifting. Combined with Rapid Fire levers, it allows even intuitive gear control in extremely difficult conditions. Shadow technology means that the derailleur has a very flattened profile, which minimizes the likelihood of hitting any obstacle on the trail. In addition, the new derailleur has a vertically stiffened design, so instances of hitting the frame while riding in really bumpy terrain are expected to be a thing of the past. The treatment should positively affect the derailleur's behavior at high speeds.

#### Features:

- Real weight: about 232g;
- Options: GS medium, SGS long travel;
- 11-tooth guide and tension wheel: sealed bearing;
- Total capacity: 35T-43T;
- Number of gears: 10speed;
