Number	10041819
EAN	7611197115472

Product description

Biodegradable lubricant for use in dry conditions. Fully synthetic wax-based oil. The new DRY LUBE oil formula provides faster penetration into even very small crevices. It displaces moisture and protects against dust and dirt. This oil provides ideal lubricity, combined with excellent protection against corrosion and wear. It reduces friction very well.

Application: Use the oil on a dry, clean chain. Crank to evenly distribute the oil in all links. Avoid contact with brake pads or rims, this product can interfere with brake operation. Shake well before use. Use when you expect dry conditions on the road.

Capacity: 56ml
