Product description

TK015B – New – headset with a locking mechanism that prevents the handlebar from hitting the frame.

We use proven materials to ensure that our headsets provide smooth performance for a long time. We know this because we test all our headsets in various conditions, ensuring you receive a top-quality product.

In this series of headsets, we use our highly polished Premium angular contact bearings to ensure smoothness. The upper cover is CNC-machined from 6061 alloy and sealed to keep moisture away from the bearings. To protect the lower bearings and fork from damage, we've used a CNC-machined crown ring made from 7075 alloy.

For convenience, we include an alloy top cap and a stainless steel forged bolt.

Headset type: Semi-integrated
Steerer: 1-1/8" - 1.5"
Head Tube ID: 44mm - 56mm
SHIS Code: ZS44 / 28.6 | ZS56 / 40
