EAN	1016488077662

Product description

Absoluteblack strives to create the best and most sophisticated sprockets on the market. Oval discs do not produce more power, they help unleash their true potential. Their most important advantages are to optimize your footwork when pedaling, reduce stress on your knees, reduce effort on climbs, and allow you to increase your speed - so you can be faster and more efficient.

Sophisticated design is not only a unique appearance but, above all, an accomplished ratio of stiffness to weight - When riding, they do not give the feeling of their "ovality" - the feeling of pedaling is maximally similar to round discs - They reduce the load on the knees in the "dead center" and facilitate smooth pedaling - They allow you to achieve and maintain an appropriate cadence - They reduce the risk of muscle cramps.

Absoluteblack Oval 96mm Shimano XT8000/SLX7000 32T sprocket

Specifications
