Product description

FEATURES OF GARBARUK SPROCKETS

- Chamfered edges and wide mud gap prevent the sprocket from getting muddy
- Variable tooth width prevents the chain from falling off
- The special shape of the teeth guarantees tighter contact with the chain and softer pedaling (compared to ordinary sprockets)
- Reduces the overall weight of the bike in the range of 150-400 grams (compared to 2x front drive)
- Increased tooth height helps keep the chain in place during shocks and vibrations of the bike
- Made of high-strength aluminum alloy

ADVANTAGES OF THE OVAL SPROCKET

- Easier uphill riding, especially on soft and slippery ground
- Improved pedaling efficiency
- Improved pedaling smoothness, narrower deadlifts, increased ranges and less strain on your glutes and knee tendons
- Even distribution of pedal torque

Chain compatibility: 10/11/12-speed chains : including Shimano HG+ and SRAM AXS flattop chains
