Product description

The Badass Box 4 Slim Lock Removal Set is a highly effective and efficient bike upgrade kit designed specifically for Bosch-powered electrics.

With the device, you can push the speed limit of the Bosch system to over 50 km/h at any time. The big advantage of this set is that it can be easily installed and dismantled again at any time if you want to restore the basic values.

Badass Box halves the speed compared to the motor system from a speed of about 18 km/h (depending on the circumference of the wheel). Maximum power will not be changed by the Badass Box.

The kit will push the highest limit of engine support to more than 50 km/h. The Bosch Badass Box V4 is compatible with all Bosch medium engines in Active Line, Performance Line, CX Line & Active Line Plus.
